SUMMARY

Web Developer with more than two years of professional experience. Involved in the website discovery, research, wireframes, mockups, and development processes.

PROFESSIONAL EXPERIENCE

Web Developer
Ghost Note Agency   **June 2017 - Present, Washington, DC**

- Successfully turned Photoshop and Adobe XD Designs / Wireframes into HTML / CSS.
- Coded the current Ghost Note Website from scratch while learning Wordpress and PHP Development. Created various animations and small microinteractions to create user friendly experiences using a combination of HTML / CSS / Javascript.
- Collaborate with the Marketing team to add proper copy to websites with the aid of Google Docs/Sheets.
- Analyze Google Analytics to see the behavior of site visitors and used the data to make a plan of action on how to get users to click Call to Actions.
- **Promoted from Junior Web Developer to Web Developer after a year.**
- Led remote CMS and Wordpress training for clients.
- Tech lead for a project building an internal dashboard for better collaboration between the team and clients using React/Redux along with Sass on the front end and Node.js, Express, and MongoDB in the backend.
- Created custom Wordpress templates using a combination of jQuery, PHP, HTML, and CSS to build interactive maps and resource repositories.
- Onboarding and mentoring provided to 4 new Junior Developers.

Telecommunications Technician
G Tech Contracting   **August 2014 - May 2017, Washington, DC Area**

- Manage a small crew to pull, terminate, install, and test infrastructure cabling for Wireless Access Points in various SEC and GSA buildings.

Telecommunications Apprentice
Truland Systems   **May 2013 - August 2014, Washington, DC Area**

- Install and test security cameras for Marriott Security at Marriott Marquis DC, alongside a crew of 10+ people, as well as train the security guards on how to use the software.

EDUCATION

Modern React with Redux   **April 2018**
Complete a 50 hour course on Udemy on React/Redux and use the knowledge gained to build out an internal dashboard.

The Complete SQL Bootcamp   **January 2018**
Completed a 10 Hour SQL Course on Udemy and used the knowledge to complete various queries of old, outdated websites to transfer data to a newer database.

Telecom Technician Program   **May 2014**
IBEW Local 26 • Lanham, MD
